SECURITY & GDPR REVIEW

Technical Security & GDPR Compliance Review

Fixed-scope reviews for SaaS, fintech, and data-handling companies in Cyprus & Greece. Two weeks from kickoff to a prioritized fix list.

WHAT THE REVIEW COVERS

01 **Authentication & authorization**
Database-level access control (row-level security) included.

02 **Secrets & configuration**
Leaked keys, tokens, and misconfigured environments.

03 **API exposure**
Broken object-level authorization (IDOR) and unauthenticated endpoints.

04 **Data mapping & retention**
What personal data you hold, where it lives, and for how long.

05 **Logging & breach readiness**
Can you detect and respond inside GDPR's 72-hour window?

06 **Cloud & CI/CD configuration**
Deployment, access, and pipeline security.

07 **Third-party exposure**
Data shared with external services and processors.

WHAT YOU GET

- **Findings report**
  Every issue severity-rated (Critical, High, Medium, Low), with evidence and a concrete fix.
- **Executive summary**
  One page a non-technical founder or board can read and act on.
- **Remediation roadmap**
  A prioritized 30/60/90-day plan. What to fix first, next, and later.
- **Live debrief**
  We walk the findings together and you ask anything you want.

THE ENGAGEMENT

2 weeks Kickoff to fix list

€3,000–5,000 Fixed scope, no hourly billing

from €1,000/mo Optional retainer

WHO RUNS THE REVIEW

I build these systems, so I know how they fail.

Full-stack developer specializing in application security, with 8+ years across web, mobile, and AI products. Recent work includes breach investigation and remediation: database-level access-control hardening, secrets rotation, and a full findings-to-remediation roadmap.

Book a free 30-minute exposure snapshot.
Walk me through your stack and I'll tell you the first places I'd look. No obligation.
